

## Preferred Product Formulary By Therapeutic Class

RESTAT administers your prescription benefit plan. Our goal is to provide the highest quality pharmaceutical care, at lower costs. **The most effective way to control costs are through the use of generic drugs and a drug formulary.**

When a generic is not available, there may be more than one brand name drug that may be appropriate for you. The brand name medications listed are considered preferred and were selected based on their ability to meet patient needs at a lower cost. If a generic medication is not available, ask your physician to prescribe a preferred brand.

### Always ask for a Generic when available to minimize your out of pocket cost.

- This list is not complete and is not a guarantee of coverage.
- Generic medications are listed in all lowercase letters while brand medications are listed in all uppercase letters.
- Generics will take the lowest copay
- Brands on the list will take the middle copay (Preferred)
- Brands not on the list will take the highest copay (Non-Preferred)
